

JTalks Home Page

Welcome to JTalks project!

JTalks.org is an open source project developed by [JavaTalks community](#). The overall idea is to build a network of components like Forums, Articles, Webinars which are interconnected and they share the same database of users. More precise (though not full anyway) information can be found on the [JTalks Functional Map](#). Here are the projects encompassed by JTalks:

- [Poulpe](#) (admin panel)
- [JCommune](#) (forum). Live Instances: [JavaTalks](#)
- [Antarcticle](#) (article component). Live Instances: [JavaTalks Articles](#)

All these projects are going to have a good integration between each other and so they will be united under one core project JTalks which will provide an ability to include/exclude components you don't want to exist within your community, more detailed information can be found [here](#). The project is developed under Lesser General Public License 2.1 (LGPL 2.1) Copyright (C). [Everyone can join us!](#)
